ryuki-xd.github.io · github.com/Ryuki-XD · linkedin.com/in/sudip-gachchhadar-802812398

BSc (Hons) Computer Systems Engineering (IT) student who builds complete, working products end to end — database-backed web apps, cross-platform mobile apps, desktop tools, and browser games. Recently shipped a two-app Flutter and Firebase delivery platform to Google Play as part of a small team. Looking for a first full-time developer role.

EDUCATION

BSc (Hons) Computer Systems Engineering (IT) — 2023 – 2026

ISMT College, Biratnagar · University of Sunderland, UK · Status: Awaiting Graduation

+2 Computer Science — Shikshadeep B.S.S · 2021 – 2023

EXPERIENCE

Flutter Developer — ByteCrew · 2026

Shiv Ganga — Water Delivery · client project, shipped to Google Play Early Access

- Worked across both apps in a small team: a customer ordering app with catalogue, cart, checkout and order history, and a delivery partner panel, sharing one Firebase backend.
- Cloud Firestore order data streaming live to drivers, scoped per partner, with a confirmed → out for delivery → delivered workflow.
- Firebase Auth with Google sign-in, Cloud Messaging push notifications, and Firebase App Check; bilingual Hindi/English interface.

SELECTED PROJECTS

- **The Aurelian Kathmandu** — full-stack hotel reservation platform in Next.js and TypeScript; a booking engine enforcing a 100-guest occupancy limit inside a database transaction, a role-based admin dashboard, and an AI concierge grounded in the hotel's own data. ryuki-xd.github.io/the-aurelian-kathmandu
- **Delivery Panel Starter** — open-source Flutter + Firebase template for driver panel apps; layered so widgets never touch Firestore. MIT licensed. github.com/Ryuki-XD/flutter-delivery-panel-template
- **AI Solutions Website** — full-stack business site with a CMS-style admin dashboard, a Google Gemini chatbot, and email automation over a Python REST API backed by MongoDB.
- **Athena Library Management System** — JavaFX desktop app over MySQL built to MVC with a DAO layer; hashed logins, overdue fine calculation, and dashboard reports.
- **Inventory Management System** — Python and SQLite desktop app with dashboard KPIs, barcode generation, PDF invoices, Excel/CSV export, and database backups.
- **Chrono Architect** and **Cyber Heist** — browser games on Phaser 3 with all graphics and audio generated in code. Both playable in the browser.
- **AI Resume Analyzer** — Streamlit ATS scorer using TF-IDF and cosine similarity for keyword coverage and skill-gap analysis.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, Dart, PHP, SQL

Mobile: Flutter, Firebase Auth, Cloud Firestore, Cloud Messaging

Web: HTML, CSS, React, Next.js, Tailwind CSS, Node.js, REST APIs

Databases: MySQL, PostgreSQL, MongoDB, SQLite, Prisma

Tools & practices: Git & GitHub, Maven, VS Code, MVC / layered architecture, CRUD & auth
